

The RVACG shall establish composting areas and encourage individual gardeners to compost in their plots.

Compost piles shall be established at the Gardens.

One pile shall be for compostable plants such as grasses, vegetables, weeds. This pile will be left to compost.

One pile shall be non compostable plants such as diseased vegetable plants, large hard stems of sunflowers and weeds, twigs and branches, etc. This pile will be taken to the dump at the end of the season.

Gardeners may also compost weeds in their own plots either by throwing the weeds back on the mulch or make a pile in their plot or through into garbage bags to heat and kill the weeds.

Gardeners may compost veggie scraps from home, dried leaves, grass clippings not treated with insecticides.

Gardeners may also add peat moss as an amendment to soil.

The Board will provide manure for gardeners to use as compost in their plots.
